Profesional Profile

I (humbly) consider myself an flexible ambitious problem solver with passion for working with and learning various web technologies. I enjoy working with like-minded developers. I have experience creating logical and innovative solutions to complex problems. I take responsibility for my own professional development through constant learning and self-evaluation.

I currently work full time as web developer for Multilink d.o.o. where i work on a number of high profile projects. I am ready for next step in my career and would like explore new options new and possibilities.

Work Experience

APRIL 2013 - PRESENT

Web Developer

Multilink d.o.o. - Full-Time

As a part of Multilink team i have built a number of large websites.

Katarina line d.o.o.

- Technologies used: HTML5/CSS3, AngularJS 1.3, Google Maps Api, ASP.net Web Services (connecting with external booking system), XML, XSLT, Custom Multilink CMS

My roles:

- HTML/CSS development of whole website, development of the Front-end application with elements of single page application (hybrid between classic server-client and SPA) AngularJS 1.3 including reservation process
- maintenance of Google Analytics page/ecommerce tracking code
- maintenance and upgrades

Arenaturist d.d

- Technologies used: HTML5/CSS3, jQuery, Google Maps Api, ASP.net Web Forms, XML, XSLT, Custom Multilink CMS

My roles:

- front end development of whole site
- A/B testing backend service
- A number of backed components
- maintenance and upgrades

Maistra d.d.

- Technologies used: HTML5/CSS3, jQuery, Google Maps Api, ASP.net Web Forms, XML, XSLT, Custom Multilink CMS

My roles:

- front-end/back-end development development for number of website components
- maintenance of Google Analytics page/ecommerce tracking code
- maintenance and upgrades

Krk.hr "widget"

- Admin application used by krk.hr clients and associates for entering events in events calendar database and creating embeds for event calendar integration on clients websites, technologies used: HTML5/CSS3, React.js, ASP.net Web API 2.0

My roles:

- planing and concept building
- HTML/CSS developement of whole website
- development of the single page admin application using React.js
- API and authentication/authorisation development using ASP.net Web API
- maintenance and upgrades

StaDanas.info - Rijeka tourist board events website

- Technologies used: HTML5/CSS3, jQuery, handlebars.js, Google Maps Api, ASP.net Web Forms, LINQ to SQL

My roles:

- front-end/back-end development of whole website
- Performace optimization (from cache every page is loaded in less than 100ms)

Viktor Lenac d.d., new website is still in demo mode and it will be published soon.

- Technologies used: HTML5/CSS3, jQuery, Google Maps Api, ASP.net Web Forms, XML, XSLT, Custom Multilink CMS

My roles:

- front-end/back-end development of whole website
- interactive map of the shipyard, map
- Performace optimization (from cache every page is loaded in less than 100ms)

I have also worked on maintenance and upgrades on number of websites developed by Multilink d.o.o. such as: www.koncar.com, www.visitrijeka.com, www.adriaticolidays.eu and more.

Technical Skills

EXPERT, 6 YEARS

HTML5 & CSS3, SASS

ADVANCED, 4 YEARS

Javascript, Google Maps Api, Gulp

ADVANCED, 4 YEARS

jQuery

BEGINNER, 1 YEAR

Angular.js, React.js

INTERMEDIATE, 3 YEARS
